Education

San Luis Obispo, CA	Cal Poly San Luis Obispo	Fall 2022 - Present
• B.S. in Software Engineering. Current GPA: 3.716. • Relevant Coursework: Data Structures, Design and Analysis of Algorithms, Object Oriented Programming, Systems Programming, Software Engineering, Software Requirements Engineering, Linear Algebra, Statistics.		

Technical Skills

- Languages: JavaScript, TypeScript, HTML, CSS, C, Java, SQL, Python
- Technologies: React, ReactNative, Node.js, Express.js, REST
- Tools: Git, Azure, AWS, Unix, Jira
- Programs: Microsoft Office, Google Suite

Projects

Anote	October 2024 - Present
<i>Creator</i> • A Python script which creates notes from mp3 files or youtube video links • Implemented OpenAI's whisper model to transcribe audio files • Implemented prompts with Ollama to interface with models like llama, mistral, gemma, etc. for summarization of the transcripts • Uses pytubefix to download audio files from youtube links	

FoodFunds	September 2024 - Present
<i>Creator</i> • Developed FoodFunds, a grocery spending tracker with a ReactJS frontend using Chakra UI and an Express.js backend integrated with a Supabase database. • Implemented CI/CD pipelines through Azure, using a Static Web App for the frontend and a Web App for the backend, automating builds, tests, and deployments through Github Actions. • Gained expertise in configuring YAML files and managing workflows to ensure efficient and reliable deployments. • Designed the app to track grocery spending, item details, expiration dates, and other useful info with real-time updates to the dashboard.	

Haggle	Winter 2024 - Summer 2024
<i>Co-Creator</i> • Developed an online marketplace using React with Primitive UI and an Express.js backend with a PostgreSQL database through Supabase. • Integrated AWS S3 for image storage. • Utilized TalkJS API for chat messaging between users. • Validated backend functionality with Mock testing and worked in a team using Agile methodologies to collaborate efficiently with a 5-person team. • Deployed application using Github CI/CD workflows with hosting on Azure and Render • Used code reviews to solidify code quality and functionality	

Employment

Student Lead	Cal Poly ITS Service Desk	Feb 2024 - Present
Led and managed student assistants in creating and managing Jira tickets to efficiently track and resolve technical issues. Supervised troubleshooting of hardware and software problems across various computer systems. Guided students and faculty through software installations, ensuring effective and clear support.
